HTML project description

Design website that contains any type of products for any company
(fashion dresses, flower shop, laptops, mobiles, …., etc.)
Design your website sections and choose your own colors and contents
The web site will contain the following pages

1- Home page
   Is your website basic page.

2- Register Page
   Allow user to enter his/her data.

3- Gallery (which contains a set of pictures for the product with brief
   description and read more link) ,
   Read more link will redirect to another page that contains full
   description of the product and form to send purchase request),
   Ask to buy button (submit) will sending mail to the admin with email
   admin@gmail.com and subject of ("buy request from"+ user name) and
   mail body will contain (address, mail, tel. number and comments)

4- Contact Us
   Submit button will send E-mail to admin admin@gmail.com with subject
   ("message from"+ user name) and body contains the rest of contents.

5- About Us
   It will contain shop owners, staff with their data.

Notes:

1- Pages design will be constructed (Page Layout) using **Divs is Mandatory.**

2- CSS must be separated from HTML tags and allocated in separate folder
   if you will use it.

3- All images must be allocated in separate folder.

4- Any extra pages will be counted (exclude any script language).

Deadline will be next Thursday 2-11-2017 @12:00AM.

Good Luck ☺
